Zatyczka do dyszy – w celu przygotowania basenu do sezonu zimowego (w szczególności przy ryzyku zamarznięcia wody), zastosuj zatyczkę do dysz napływowych, odcinając dopływ wody do zestawu filtracyjnego. **Pozostaw dyszę w basenie, zamontuj zatyczkę pod wodą. Należy pamiętać również o odłączeniu zestawu filtracyjnego od źródła wody i dokładnym osuszeniu dyszy od strony zewnętrznej. Zaleca się także, aby z pompy jak i dołączonego filtra piaskowego na okres zimy (miejsca gdzie występują mrozy) usunąć pozostałości wody, w innym przypadku zamarzająca woda może dokonać zniszczenia całości zestawu.**

Bouchon pour la buse de refoulement – afin de préparer la piscine pour l'hiver (en particulier en cas de risque de gel de l'eau), veuillez utiliser le bouchon spécialement fourni avec le skimmer et destiné à fermer l'accès de l'eau au système de filtration. **Veuillez laisser la buse de refoulement dans la piscine, montez le bouchon sous l'eau. Il est également indispensable de déconnecter le système de filtration du point d'arrivée d'eau et de s'assurer que la partie de la buse de refoulement placée à l'extérieur de la piscine soit parfaitement sèche. En plus, il est conseillé de vider le reste de l'eau se trouvant dans la pompe et le filtre à sable surtout en période de gel. L'eau qui gèle à l'intérieur du système de filtration peut causer des dégâts et des dysfonctionnements.**

Rubber plug- in order to prepare the pool for the winter season (especially if there is a risk of freezing) put a plug into the inlet to shut off the access of water to the filtration system. **Inlet must remain in the pool. Fix the plug under water. Remember to disconnect the filtration set from the pool and dry the inlet (the part of inlet which is outside of the pool). For the winter season, it is recommended to get rid of water remaining in pump and sand filter, otherwise freezing water can cause devastation of the whole set.**

Stöpsel für die Düse – den Pool für die Wintersaison vorbereiten (insbesondere wegen der Gefahr des einfrierenden Wassers), verwenden Sie dazu die Zuflusssdüse. Schneiden Sie die Wasserzufuhr zu dem Filtersystem ab, nachdem Sie den Filter abgetrennt haben, sollten Sie auf die gründliche Trocknung der Düse von außen achten, und dass die Filteranlage von der Wasserquelle abgetrennt ist. **Lassen Sie die Düse in den Pool, installieren Sie den Stöpsel unter dem Wasser. Es wird auch empfohlen, aus dem Sandfilter sowie der Pumpe restliches Wasser zu entfernen (Stellen wo Frost entstehen kann), da sonst das gefrierende Wasser das komplette Filtersystem beschädigt.**

Rubberen stop - om de toegang van de inlaat (jet straal) voor het filtersysteem af te sluiten ter voorbereiding op het winterseizoen (vooral als er een risico bestaat op bevriezing van water). **De inlaat moet in het zwembad blijven. Bevestig de stop onder water. Let op dat u de het filtersysteem loskoppelt van het zwembad en de achterkant van de inlaat laat drogen en achterblijvend water te verwijderen, ter voorkoming van beschadiging in het filtersysteem door bevriezing van water.**
